Description

Good Health Omega 3 fish oil 1500mg is a primary source of the important omega 3 fatty acids eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA) often deficient in modern diets. EPA and DHA have been shown to provide many positive health benefits particularly for the cardiovascular and nervous systems. We use only use fish caught in the wild. No farmed fish. The fish are caught in one of the purest, richest marine environments in the world. These fisheries are managed by some of the world's toughest regulations, providing a sustainable, renewable resource. In fact, this region has maintained a consistent fish population for more than 30 years.

*High strength when compared to 1 standard 1000mg fish oil capsule.
